

snapNwin™ Artwork Submission Overview

This document contains 4 pages, this the Overview page, and the 3 template pages we require to assemble a snapNwin™ card, as follows;

- **Side A**

Known as the Magnet Side is the most complex of the 3 sides because it incorporates the snap out magnet portion of the card.

- **Side B**

The Inside Message Side usually reflects the prize, code or the message you wish deliver when the Magnet portion is snapped and peeled back and off from the card. There could be any number of multiple messages depending what you wish to accomplish with your campaign.

- **Side C**

Known as the Back Side, usually reflects additional information, contest instructions or campaign rules.

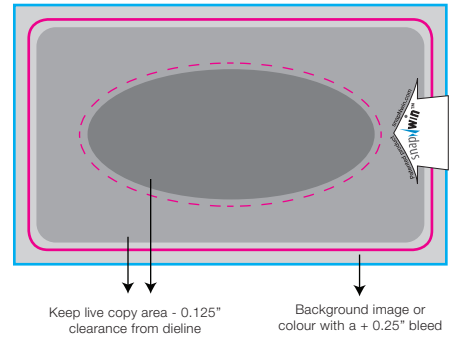

Following the instructions listed with each template, please prepare artwork using the 3 separate templates provided, for at least the 3 sides as referenced above. Multiple versions of the Side B, the Inside Message are, of course, acceptable. Each Side should be on a separate 300 dpi Press Quality PDF page with the die as well as bleed lines removed, while conforming to the instructions detailed on each template page.

Please do not hesitate in contacting us with any questions, should they arise.

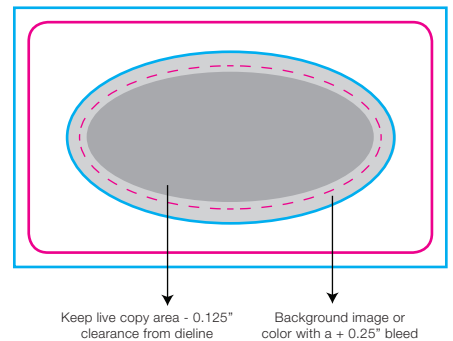

Thank you,
snapNwin™ Administration

Example template for illustration purposes only, these guidelines apply across all templates.

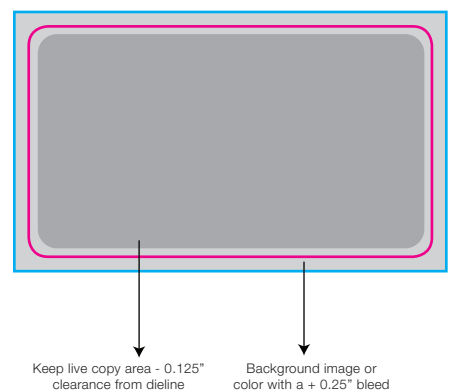

Side A

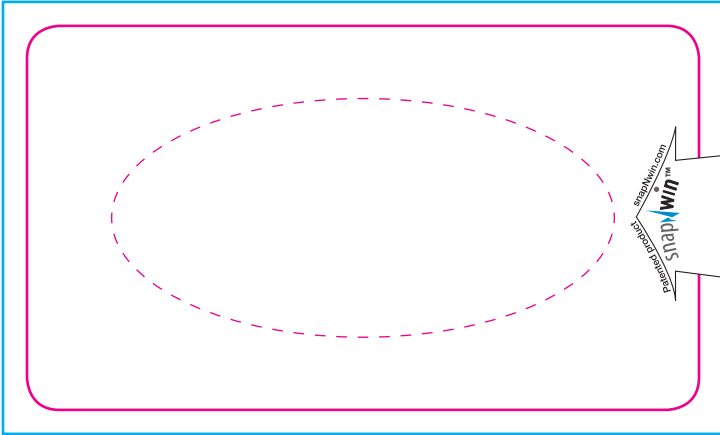

Side B

Side C

Side A: Magnetic Side

Control Code: BCO-090811SA

The snapNwin™ logo as well as arrow and “patented product” content are required on Side A (magnet side) only and are to be included artwork design files.

* Use arrow with black text for light color artwork, and arrow with white text for dark color artwork.

-  = Final Trim Size
-  = Snap Out Portion
-  = Bleed (+ .25” on all cut edges)

Card Size: 2” x 3.5”

All corner radii: .167”
